Re: Sherry True
Spirit Paws

To Whom It May Concern:

This is a testimonial for the services of Sherry True of Spirit Paws. I had Sherry come to my home to work with my dog. My dog had two behavioral issues and is very hyper. Well, after about a 30 minute massage from Sherry my hyper dog was in la-la land. If I didn't see it with my own eyes I wouldn't have believed it! She seems more mellow to this day.

The first behavioral issue was particularly troublesome for me. It seems that some dogs like to roll themselves around in deer poo in order to disguise their scent for the hunt. The reason didn't fly with me, I just needed her to stop as you can imagine how distasteful the job of cleaning her up every couple of days was -- and

sometimes daily. I don't know what Sherry said to her that I hadn't already said to try to stop the behavior, but she has been clean every day since.

The second behavioral issue was one that made me feel so sad for my girl. Her biggest treat used to be to go for a ride in the car. She just loved it. Then one day I totaled my car while she was in it, and she popped out of her seat belt. Ever since then if I say I'm going for a ride or if I even take steps toward my vehicle, she turns tail and runs back up toward the house and plants her bottom firmly on the front porch. Sherry advised me as to how to work with her in resolving this issue. She now gets in the car of her own volition and doesn't "bolt" to get out of the car when I open the door. Rather she waits for my command that it's O.K. to exit the vehicle.

In short, Sherry has definite gifts and abilities that benefit the animal kingdom and humans alike. I wholeheartedly recommend her services with no reservations whatsoever. Your animals will thank you for it.

Sincerely,

Joann M. Hirsch
